

**Dr. Elizabeth N. Pearce, MD, MSc** is a Professor of Medicine and the Endocrine Fellowship Program Director at Boston University School of Medicine in the Section of Endocrinology, Diabetes, and Nutrition. She received her undergraduate and medical degrees from Harvard and a masters' degree in epidemiology from the Boston University School of Public Health. She completed her residency in internal medicine at Beth Israel Deaconess Medical Center, and her fellowship in endocrinology at Boston University. She was the 2018-2019 President of the American Thyroid Association. She

serves as the Regional Coordinator for North America for the Iodine Global Network. She is a Deputy Editor at the Journal of Clinical Endocrinology and Metabolism and has served in multiple additional editorial roles, including as an Associate Editor for Endocrine Practice, Clinical Thyroidology, and Thyroid. She co-chaired the 2017 American Thyroid Association's Thyroid in Pregnancy Guidelines Task Force and is a member of the current task force for revising that guideline. She is currently serving on a World Health Organization guideline advisory panel related to assessment of iodine nutrition. Her research interests include the sufficiency of dietary iodine in the U.S., thyroid function in pregnancy, the thyroid effects of environmental disruptors, and the cardiovascular effects of subclinical thyroid dysfunction. Dr. Pearce was the 2011 recipient of the American Thyroid Association's Van Meter Award for outstanding contributions to research on the thyroid gland and the 2018 Women in Thyroidology Woman of the Year.
